

https://www.mendeley.com/

Mendeley es una aplicación web y de escritorio, propietaria y gratuita. Permite gestionar y compartir referencias bibliográficas y documentos de investigación, encontrar nuevas referencias y documentos y colaborar en línea

Mendeley Dispositivos Móviles

Mendeley Web

Πυερ

Campo de Gibraltar

- Recibir actualizaciones de tu red personal
- Acceder, actualizar y administrar tu biblioteca personal de referencias
- Crear y mantener tu perfil personal de Mendeley
- Encontrar y conectarse con otros investigadores
- Recibir sugerencias a medida de documentos para leer
- Revisar tus estadísticas de publicación personal
- Crear, unirse y hacer crecer grupos de investigación colaborativos
- Buscar en el catálogo web de Mendeley documentos y referencias para agregar a tu biblioteca personal

Acceder a estas funciones desde un navegador de Internet en cualquier momento

Your research, anywhere.

For students and researchers

Mendeley is a free reference manager and academic social network. Make your own fully-searchable library in seconds, cite as you write, and read and annotate your PDFs on any device.

D.O.I (Digital Object Identifier System)

Un **DOI** (Digital Object Identifier) es una forma de identificar un objeto digital (por ejemplo un artículo electrónico de una revista, un capítulo de un libro electrónico...) sin importar su URL, de forma que si ésta cambia, el objeto sigue teniendo la misma identificación. Se usa extensivamente en publicaciones electrónicas como revistas científicas y otras.

Cómo localizar el DOI de un artículo: Es necesario localizar en la red el artículo en cuestión y el DOI aparecerá en la cabecera del propio documento electrónico o bien al pie de página del mismo.

From the abstract page you will be able to choose your preferred format for downloading and viewing the paper.

PMID es un número único asignado a cada cita de un artículo de revistas biomédicas y de ciencias de la vida que recoge **PubMed**

MEDLINE Complete

EBSCO Health

PubMed es un motor de búsqueda de libre acceso a la base de datos MEDLINE de referencias bibliográficas y resúmenes de artículos de investigación biomédica.

MEDLINE o Medline es posiblemente la base de datos de bibliografía médica más amplia que existe. Producida por la Biblioteca Nacional de Medicina de los Estados Unidos

Resilience refers to an individual's ability to thrive despite adversity. The current study examined thepsychometric properties of the Connor-Davidson Resilience Scale (CD-RISC). Three undergraduatesamples (ns>500) were used to determine the factor structure of the CD-RISC. The first two sampleswere used to conduct exploratory factor analysis (EFA), and the third was used for confirmatory factoranalysis. The EFA showed that the CD-RISC had an unstable factor structure across two demographically equivalent samples. A series of empirically driven modifications was made, resulting in a 10itemunidimensional scale that demonstrated good internal consistency and construct validity. Overall, the 10-item CD-RISC displays excellent psychometric properties and allows for efficient measurement of resilience.

Psychometric Analysis and Refinement of the Connor-Davidson Resilience Scale (CD-RISC): Validation of a 10-Item Measure of Resilience

Laura Campbell-Sills Department of Psychiatry, University of California San Diego, La Jolla, CA

Murray B. Stein Department of Psychiatry, University of California San Diego, La Jolla, CA; Department of Psychology, San Diego State University; and VA San Diego Healthcare System, San Diego, CA

Resilience refers to an individual's ability to thrive despite adversity. The current study examined the psychometric properties of the Connor-Davidson Resilience Scale (CD-RISC). Three undergraduate samples (ns > 500) were used to determine the factor structure of the CD-RISC. The first two samples were used to conduct exploratory factor analysis (EFA), and the third was used for confirmatory factor analysis. The EFA showed that the CD-RISC had an unstable factor structure across two demographically equivalent samples. A series of empirically driven modifications was made, resulting in a 10-item unidimensional scale that demonstrated good internal consistency and construct validity. Overall, the 10-item CD-RISC displays excellent psychometric properties and allows for efficient measurement of resilience.

Abstract:

The effectiveness of an 8-week mindfulness training for adolescents aged 11–15 years with ADHD and parallel Mindful Parenting training for their parents was evaluated, using questionnaires as well as computerized attention tests. Adolescents (N = 10), their parents (N = 19) and tutors (N = 7) completed measurements before, immediately after, 8 weeks after and 16 weeks after training. Adolescents reported on their attention and behavioral problems and mindful awareness, and were administered two computerized sustained attention tasks. Parents as well as tutors reported on adolescents'

ORCID (Open Researcher and Contributor ID

- Es un código alfanumérico, no comercial, que identifica de manera única a científicos y otros autores académicos
- Esto responde al problema de que las contribuciones de un autor particular a la literatura científic pueden ser difíciles de identificar pues la mayoría de nombres personales no son únicos
 sino que pueden cambiar (por ejemplo en el matrimonio).
- De esta forma, existen diferencias culturales en el orden de los nombres, hay incongruencias en el uso de las abreviaturas del nombre de pila, o se emplean diferentes sistemas de escritura.
 Este código proporciona entonces una identidad duradera para
- Este código proporciona entonces una identidad duradera para humanos, similar a aquellos que son creados para entidades de contenido relacionado con las redes digitales, lo cual se hace a través de identificadores de objetos digitales (DOI).

Presentación

IraLis (International Registry of Authors-Links to Identify Scientists) es un sistema de estandarización de las firmas de los autores científicos. Su objetivo es crear un registro de autoridades.

Trabaja en 5 líneas:

1. Concienciar a los autores científicos sobre la importancia de la firma para ser citados correctamente, y para poder recuperar toda la bibliografía a lo largo de su carrera profesional.

2. Redactar criterios de firma normalizada para

a) ser indexado correctamente y

b) distinguirse de otros autores con nombres iguales.

3. Producir una base de datos con todas las variantes de firma utilizadas por cada autor.

4. Realizar búsquedas bibliográficas automáticas usando las variantes de firma.

5. Ser la autoridad de firmas del repositorio E-LIS

panish nglish	Registre su IraLIS
raLIS	^
Registre su IraLIS Buscar nombres IraLIS	Paso 3: ver ejemplos con el iralis seleccionado
	Usted deberá firmar sus trabajos: Jorge A Turanzas
	La mayoria de bases de datos construyen sus índices permutando la última palabra que consideran el apellido y usando las iniciales del resto y por tanto aparecerá como: Turanzas, JA
	Si le parece correcto registre ahora su ficha iralis. Para ello entre una dirección de correo electrónico válida y una contraseña que le permitirá editar en un futuro su registro iralis.

¿Qué es CVN?

CVN es un currículum vítae único para los investigadores e interoperable entre los sistemas informáticos:

- Un currículum vítae digital y normalizado con un contenido y formato común.
- · Un estándar de intercambio de la información científica y curricular

Que posibilita:

- . Unificar el formato de CV en las distintas convocatorias de actuaciones de I+D+I
- Facilitar la transferencia y valorización de resultados de la investigación
- Contribuir al desarrollo de la administración electrónica

Objetivo

- · Ayudar a los investigadores a transportar su CV de un sistema a otro
- Ayudar a las instituciones a agilizar los procesos de gestión, explotación, transferencia y creación de estadísticas de datos curriculares
- · Ayudar a los gestores públicos a reducir los costes de gestión y las cargas administrativas.
- Ayudar a los evaluadores a reducir el tiempo de los procesos de evaluación y acreditación del personal investigador.

Editor CVN

La FECYT (dependiente del Ministerio de Ciencia, Innovación y Universidades) pone a disposición de los investigadores esta aplicación que facilita la edición en pantalla de un currículum vítae normalizado.

Tengo mi currículum vítae en otro formato

Esta herramienta permite importar currículos completos en formato CVN-PDF, Formae o CICYT. Asimismo, posibilita cargar automáticamente las publicaciones desde las bases de datos de PubMed, WoS o Scopus y desde el sistema ORCID.

¿Tienes ya un currículo en formato CVN?

Si es así, no es necesario que utilices esta herramienta desde cero. Si perteneces a una de las instituciones que tiene implantado el servicio CVN, puedes generar tu currículum normalizado desde el sistema curricular de tu institución e importarlo al Editor de FECYT. El listado de entidades que han adaptado sus aplicaciones informáticas a CVN puedes consultarlo aquí.

ResearchGate es una red social en Internet y una herramienta de colaboración dirigida a personas que hacen ciencia de cualquier disciplina. La plataforma ofrece acceso gratuito a las aplicaciones Web 2.0 más modernas, por ejemplo una búsqueda semántica de artículos de revistas científicas en una base de datos con más de 35 millones de registros, foros, grupos de discusión, etc.

Journal Citation Report (JCR) es el indicador de calidad más conocido y el más valorado por los organismos de evaluación de la actividad investigadora. Mide el impacto de una revista en función de las citas recibidas por los artículos publicados y recogidos en la Web of Science (WOS).

JCR tiene dos ediciones anuales, JCR Science Edition y JCR Social Sciences Edition. La ventana de publicación es de dos años retrospectivos, aunque existe un Factor de Impacto con los datos de 5 años atrás. No hay factor de impacto para Arte y Humanidades, salvo para Historia y Lingüística.

Web of Science Group

Cuartiles de Revista (Índice Q)

Q Es la unidad utilizada para la medida de posición de una revista.

Se utiliza separando los grupos de revistas de una determinada especialidad, ordenados de mayor a menor visibilidad (factor de impacto).

Si un listado de revistas ordenadas de mayor a menos factor de impacto se dividiera en 4 grupos iguales, cada una de las partes constituiría un cuartil. Aquellas que contengan mayor factor de impacto estarían en el primer cuartil, y el cuartil más bajo sería el cuarto.

Revistas	FI 2017*	Q (posición) 2017	Categoria/s
International Journal of Clinical and Health Psychology	3,900	Q1 (14/127)	Psicología Clínica
European Journal of Psychology Applied to Legal Context	3,524	Q1 (6/147) Q1 (17/135)	Derecho Psicología Multidisciplinar
Revista de Psicodidáctica	2,075	Q2 (16/59)	Psicología Educacional
Psychosocial Intervention	1,545	Q2 (55/135)	Psicologia Multidisciplinar
Psicothema	1,516	Q2 (57/135)	Psicologia Multidisciplinar
Journal of Work and Organizational Psychology-Revista de Psicología del Trabajo y de las Organizaciones	1,186	Q3 (57/82)	Psicología Aplicada
Revista de Psicología del Deporte	0,922	Q4 (69/82)	Psicologia Aplicada
Psicología Conductual	0,898	Q4 (103/127)	Psicología Clínica
Revista de Psicología Social**	0,886	Q4 (56/64)	Psicología Social
Anales de Psicología	0,756	Q4 (103/135) Q4 (69/78)	Psicología Multidisciplinar Psicología-SCI
Infancia y Aprendizaje**	0,691	Q4 (53/59) Q4 (70/73)	Psicología Educacional Psicología del Desarrollo
Spanish Journal of Psychology	0,629	Q4 (110/135) Q4 (71/78)	Psicologia Multidisciplinar Psicologia-SCIE
Psicológica	0,556	Q4 (85/85)	Psicología Experimental
Estudios de Psicología**	0,418	Q4 (123/135)	Psicologia Multidisciplinar
Clinica y Salud	0,324	Q4 (125/127)	Psicologia Clinica

Tabla 1. Revistas españolas de Psicología, atendiendo al Factor de Impacto del Journal Citation Reports (JCR) de 2017.

Fecha obtención de los datos: 26 de junio de 2018.

Nota. FI = Factor de Impacto; Q = Cuartil.

*Revistas ordenadas por el Factor de Impacto de 2017.

** Se incluyen como revistas españolas ya que, a pesar de estar indexadas en Inglaterra en el JCR (por ser la editorial de ese país) corresponden a España (tal y como se puede ver en ediciones anteriores del JCR).

Nuevas revistas incorporadas en JCR 2017. Revistas que han aumentado el FI de 2017 (en comparación al 2016). Revistas que han bajado el FI de 2017(en comparación al 2016).

RECURSOS CIENTÍFICOS

La Fundación Española para la Ciencia y la Tecnología FECYT, gestiona las licencias de las dos principales bases de datos mundiales de referencias bibliográficas y citas de publicaciones periódicas **Web of Science**, propiedad de Clarivate Analytics y **Scopus**, propiedad de Elsevier. Las instituciones con acceso a estas bases de datos, de contenido científico relevante para la investigación son las Universidades (públicas y privadas) "Organismos Públicos de Investigación, Centros Tecnológicos, Parques Científicos, Servicios de Investigación Agraria, Servicios de Investigación Sanitaria y Administración Pública de I+D. Gracias a esta única gestión, todas estas instituciones obtienen inmejorables condiciones económicas, el acceso a una serie de servicios adecuados para instituciones e investigadores y la accesibilidad tecnológica necesaria para poder consultar la información.
